Section 4: First-aid measures

General advice	: First aid personnel should pay attention to their own safety. If the patient is likely to become unconscious, place and transport in stable sideways position (recovery position). Immediately remove contaminated clothing. In all cases of doubt, or when symptoms persist, seek medical attention. Move out of dangerous area. Never give anything by mouth to an unconscious person.
If inhaled	: If breathed in, move person into fresh air. If breathing is irregular or stopped, administer artificial respiration. If symptoms persist, call a physician.
In case of skin contact	: If skin irritation persists, call a physician. Do NOT use solvents or thinners.
In case of eye contact	: Immediately wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist. Call a physician immediately. If easy to do, remove contact lens, if worn.
If swallowed	: Rinse mouth. Do NOT induce vomiting. If symptoms persist, call a physician.
Most important symptoms and effects, both acute and delayed	: Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11. Risk of product entering the lungs on vomiting after ingestion. When inhaled (e.g. during vomiting) risk of pulmonary oedema and/or pneumonia. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage.
Notes to physician	: Treat symptomatically. After skin contact, treat the affected area with a potent topical corticosteroid preparation (e.g., betamethasone 0.1%).

Section 5: Fire-fighting measures

Suitable extinguishing media	: Dry powder Carbon dioxide (CO ₂) Water spray Foam
Unsuitable extinguishing media	: High volume water jet
Specific hazards during fire fighting	: Hazardous decomposition products formed under fire conditions.
